Artyom Fadeyev

SOFTWARE ENGINEER WORKING STUDENT

TIKTOK

Dear Hiring Manager,

As a passionate Software Engineer and long-time admirer of TikTok, I was excited to see an opening for a Intern Software Engineer role. Considering my significant programming experience, technical expertise, and the recent internship I completed in software development, I am confident I have the key skills to be an asset to TikTok.

During my internship with Playrix, I gained a hands-on experience coding under the direction of a team, collaborating of software projects, and testing systems and applications. One of my responsibilities was the development of a new microservice serving all employees of the company. I implemented it myself from coding to deployment and testing. I have also recently gained experience in providing solutions in systems design, database design and operating systems.

I also have experience in Machine Learning, Agile project management and front-end development.I repeatedly use public APIs that automate company processes for employees and help them focus on solving problems.

I believe I would make an excellent addition to your team. This internship would help me grow my real-world experience in the technology industry and help me further develop and refine my application design skills.

I look forward to hearing from you!
